 PRIORITY   
 OXCART MAT  
 REF

1. THE FILM WAS IN THE PACKAGE FOR 11 DAYS. THE NORMAL PREFLIGHT DOES NOT INCLUDE CHANGING THE DATA CHAMBER CARD. THIS IS DONE DURING GENERATION WHEN A MISSION NUMBER IS ASSIGNED. THE FIRST PREFLIGHT INDICATED ACTUALLY TOOK PLACE ON 20 AUG WITH DATA CARD FOR BX6713 STILL IN THE DATA CHAMBER.

2. DUE TO THE REJECTION OF THE MAJORITY OF SPARE FILM AT  IT IS NECESSARY TO CONSERVE AS MUCH AS POSSIBLE. THE PACKAGE, WITH THE FILM INSTALLED, WAS KEPT IN THE SAME ENVIRONMENT AS THE OTHER READY FILM.

3. PRIOR TO EACH PREFLIGHT, THE FILM WAS CHECKED IN THE DARK-ROOM FOR PROPER STACKING AND TENSION. THERE WAS NEVER ANY INDICATION THE FAILURE WAS CAUSED BY BAD FILM AND THE FILM WAS NOT SUSPECT. DO NOT FEEL THAT 11 DAYS IN PACKAGE IS EXCESSIVE.
